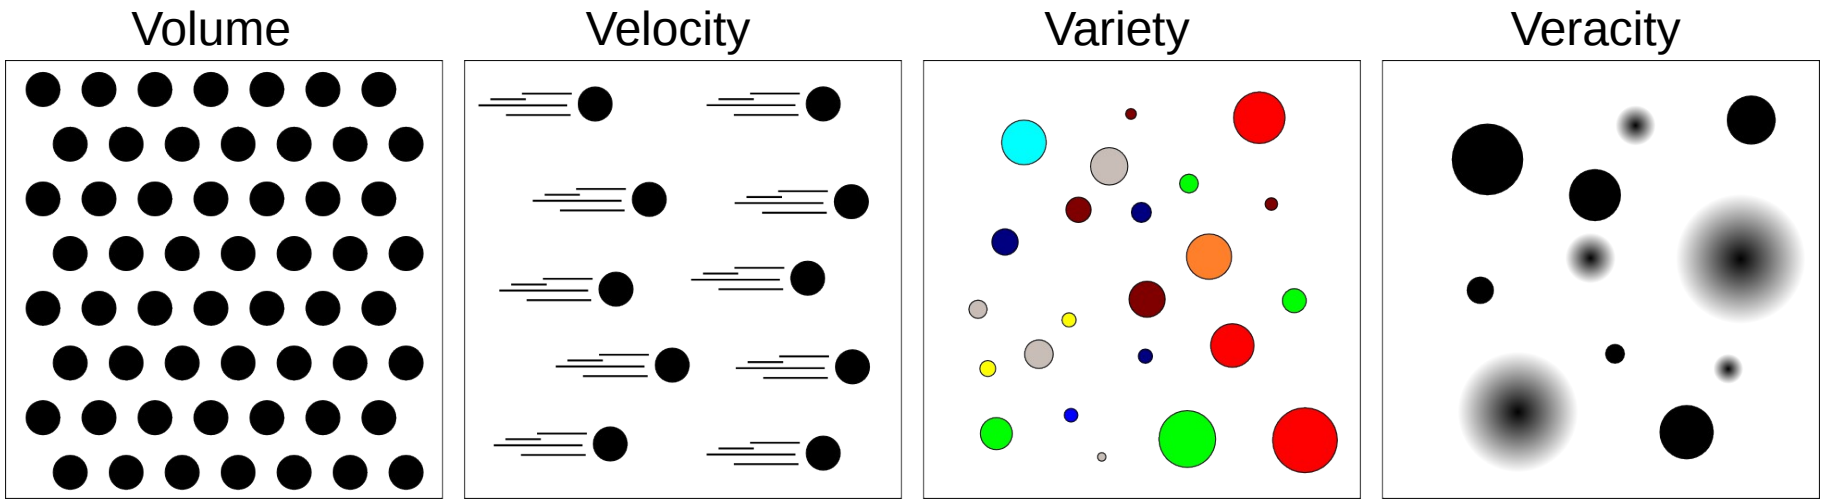
Herausforderungen von Big Data für die Bibliotheks- und Informationswissenschaft

Prof. Dr. Robert Jäschke
Leibniz Universität Hannover

Stand der Vorlesung

Kapitel 10: Big-Data-Technologien

- Einführung
- LIS und Big Data
- Methoden und Technologien



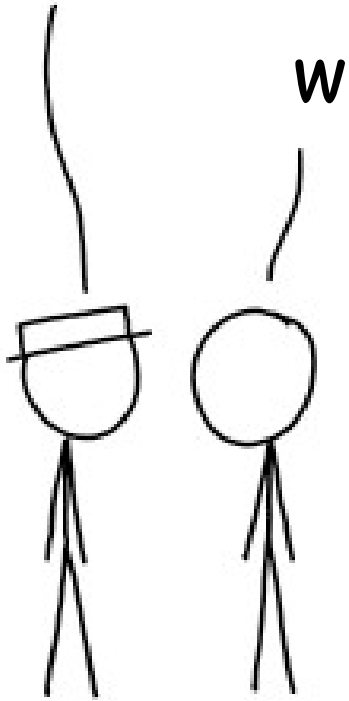
Thema und Lernziele

- LIS und Big Data
  - Fokus auf wissenschaftliche Bibliotheken

- Lernziele
  - verstehen, warum/wie Big Data Bibliotheken betrifft
  - den Unterschied zu traditionellen Medien verstehen
  - Herausforderungen für Bibliotheken (er)kennen und aus Fallbeispielen ableiten können

LIS und Big Data

What is the Library's role with “big data”?



What is the Library's role with any information?

(R. Munroe/M. Furlough)

Velocity

In every 24-hour period approximately 20,000,000 words of technical information are being recorded. A reader capable of reading 1,000 words per minute would ***require 1.5 months****, reading 8 hours every day,* ***to get through 1 day's technical output****, and at the end of that period, he would have fallen 5.5 years behind in his reading!*

Velocity

In order to emphasize the problem, it is worthwhile to cite some figures. The rate at which technical documents are produced at the present time is estimated to be well over 500,000 per year. **In every 24-hour period approximately 20,000,000 words of technical information are being recorded. A reader capable of reading 1,000 words per minute would require $1\frac{1}{2}$ months, reading 8 hours every day, to get through 1 day's technical output, and at the end of that period, he would have fallen $5\frac{1}{2}$ years behind in his reading!** Even in attempting to read the portion of the literature in a single subject field such as chemistry, he would find himself falling behind an estimated 850,000 pages per year. This production rate of scientific information will undoubtedly increase as countries such as China and India begin to produce technical work commensurate with their size.

Some scientists claim it takes less time to do an experiment than to find out whether or not it has been done before.

(J. Naisbitt, 1982)

Losing My Revolution

How Many Resources Shared on Social Media Have Been Lost?

Hany M. SalahEldeen and Michael L. Nelson

Old Dominion University, Department of Computer Science
Norfolk VA, 23529, USA
{hany,mln}@cs.odu.edu

Abstract. Social media content has grown exponentially in the recent years and the role of social media has evolved from just narrating life events to actually shaping them. In this paper we explore how many resources shared in social media are still available on the live web or in public web archives. By analyzing six different event-centric datasets of resources shared in social media in the period from June 2009 to March 2012, we found about 11% lost and 20% archived after just a year and an average of 27% lost and 41% archived after two and a half years. Furthermore, we found a nearly linear relationship between time of sharing of the resource and the percentage lost, with a slightly less linear relationship between time of sharing and archiving coverage of the resource. From this model we conclude that after the first year of publishing, nearly 11% of shared resources will be lost and after that we will continue to lose 0.02% per day.

Fallbeispiel: Web-Archivierung

To do a large-scale social, political, or economic history of periods after the mid 1990s will at the very least be considerably enhanced by an understanding of Web data.

(William J. Turkel, Professor of History, 2015)

Fazit

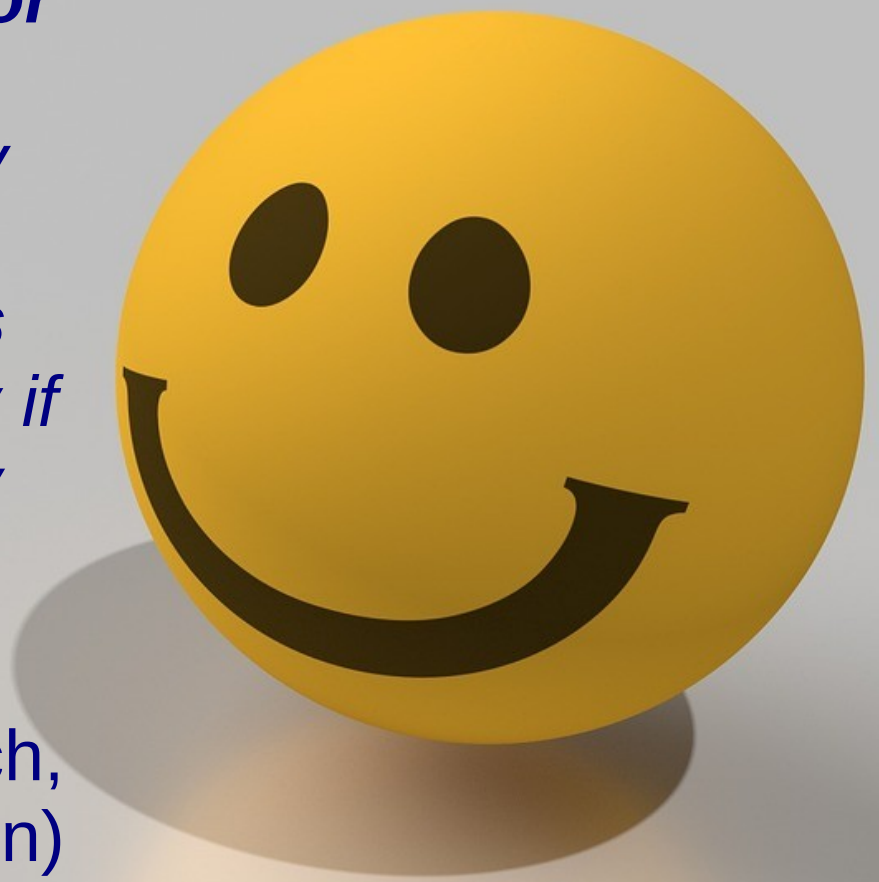
big data affects libraries directly and tangentially: directly because your library can ***use big data tools to analyze your big data sets****; and tangentially, as the faculty at your school will increasingly* ***incorporate big data into their research***

(Mark Bieraugel: Keeping up with... Big Data, 2013)

Fazit

There has probably never been a better time to be a librarian or an information professional.
We live in an information society with access to more information than ever before, and ***librarians have an important role to play*** *if people are going to successfully avoid the much discussed information overload.*

(D. Stuart, Centre for e-Research, King's College London)



Kontrolle des Lernerfolgs

- Wie sind die LIS-Aufgabenbereiche durch Big Data betroffen?
- Welche Herausforderungen ergeben sich bei der Web-Archivierung?
- Erarbeiten Sie für ein anderes Fallbeispiel die Herausforderungen, die sich für LIS durch die Eigenschaften von Big Data ergeben.
