Declaration of consent for participants for the project LE6_spr_replication

I have been informed about the planned investigation for the project by Prof. Knoeferle (responsible sponsor and head of the research project). I have read and understood the participation information sheet for the above project. I feel physically able to take part in the attempt.

My participation in the study is voluntary. There are no disadvantages for me if I do not participate in the study. It is clear to me that I can cancel the study at any time without incurring any disadvantages. After completing the participation and submitting the survey responses, it is no longer possible to withdraw this consent because the researchers cannot assign my responses to my person.

My survey data is only processed for the above-mentioned study and for no other purpose. The data will not be passed on to third parties unless a journal requires its publication in a completely anonymous form. The results are only published in anonymous form. Publications will be listed on the group's homepage (<https://amor.cms.hu-berlin.de/~knoeferp/index.html>). My original data will be archived for at least 10 years.

I have read the Participant Information Sheet, I feel well-informed and understand what was stated in the Participant Information Sheet. I have had enough time to make my decision and received an electronic copy of this declaration of consent and the subject's information sheet about the research project. I agree that my data will be processed as described in the subject information sheet and that the individual data sets (demographic information such as age and gender as well as the experimentally collected data) will be linked.

I hereby declare that I am over 18 years old.

By clicking on 'continue' I voluntarily agree to participate in the planned investigation.
